3 chargers in Dolny Kubin

Case Study Charging stations - Dolny Kubin, SK

Dolny Kubin implemented 6 EV chargers (AC 22 kW) with Seak technology integrated into smart public lighting poles, a forward-thinking approach with multiple benefits. The poles provide both lighting and EV charging, maximizing the use of existing infrastructure. And the chargers dynamically share power dynamically between ports, ensuring efficient energy distribution. The city uses Seak's Chargeme.online app to manage the charging points.

Location of 6 charging points

- Tax Office - 2x 22 kW AC charging lamps
- Cinema Hviezdoslav sq. - 2x 22 kW AC charging lamps
- Koliba restaurant - 2x 22 kW AC charging lamps

Charger integrated to lamp post
